## Digital Resources for Higher Education in India

### CONCEPT NOTE

Digital Resources can be defined as materials that have been conceived and created digitally or by converting analogous materials to digital format. These resources are usually characterized by their open accessibility and multimedia mode. The webinar addresses the issues and challenges faced by Institutes of Higher Education in our country in imparting quality education during the Covid-19 pandemic and thereafter. The only solution at sight, it seems, is the effective use of various digital resources & e-learning platforms. The objective of the forum is to discuss how to access and utilize the e-resources and e-platforms in teaching, learning and research in a challenging time like the present one.
