Career counselling is a systematic process that helps a student understands one's self, as well as the world of work, to choose the right career. It is the process of helping students and professionals to analyze their strengths, interests, abilities and skills. The right career choice is often an intersection of a student's interests and abilities, and industry trends. The college, through its Career Counselling Cell, conducts such quality programmes regularly to orient the students about job opportunities in different sectors.
